Part B: Review of outcomes in the previous academic year 2021-22

Pupil premium strategy outcomes

This details the impact that our pupil premium activity had on pupils in the 2021 to 2022 academic year.

The cohort of year 11 pupil premium students achieved in line with the rest of the year 11 cohort enabling all students to progress onto post 16 choices. Pupil premium progress 8 was measured at +0.34 but this is still to be verified.

Our academic mentoring for specific pupil premium students in year 11 has been seen to have a positive outcome on them both academically and socially.

Our last set of in year data showed that Year 10 students were showing positive progress 8 outcomes.

Our last set of in year data showed that Year 9 pupil premium students were performing to similar levels to that of the whole cohort.

Our Key Stage 3 pupil premium students have been tracked throughout the year and where students have been highlighted as falling below expected levels, interventions have been put in place in core subjects.

The use of GCSE POD across the school has increased substantially to support students learning and revision.

The school organised a CPD programme for staff to help improve pedagogy.

Within subject areas during term 5 and 6, teachers arranged assessments to find out where students have gaps and this information is being used to help inform teaching this academic year. An example of this is within the English Department where highlighted students are now receiving interventions regarding literacy skills.

Counselling has also been provided for students where a need has been highlighted.
