

The nature of the subject means that students can be stretched through their design process, more able students can conduct more independent research or develop more sophisticated solutions to their problems. They are encouraged extend their learning outside of the classroom with monthly challenges which could include live design briefs from companies or cooking for their family. They are encouraged to follow innovate companies on social media and show an interest in how things are made. Above all we will include wider reading activities, cooking activities, research tasks and activities that inspire and encourage a natural curiosity about the world around them and seek to show how Design and Technology effects all areas of their life. Study support lessons and “open door” option for KS5 where students can come and work in department. KS4 prefect lessons Possible trips to BMW Mini (Oxford factory) New Designers Exhibition, London, MJ Allen, Ashford, Design museum,
