

## CHEMISTRY INDEPENDENT LEARNING

### A LEVEL CHEMISTRY

1. After each lesson review your lesson notes and make a note of anything that you don't understand. Locate the relevant information on Teams, Kerboodle and in the OCR textbook. Add anything extra or interesting to your notes. Complete the summary questions.
2. Regularly use Chemistry revision sites. There are links to some of these on the Teams page:
  - [www.chemguide.co.uk](http://www.chemguide.co.uk)
  - [www.chemsheets.co.uk](http://www.chemsheets.co.uk)
  - [www.revision-notes.co.uk](http://www.revision-notes.co.uk)
  - [www.kerboodle.co.uk](http://www.kerboodle.co.uk)
3. Use the journals in the school library to keep up to date with the latest Chemistry issues.
4. When you know you have a practical task, consult the OCR learner skills checklist and ensure that you are fully prepared. Make any extra notes that you need in your lab book.
5. Regularly check the OCR website and the Chemistry Teams pages for updated assessment material.
