

CHEMISTRY INDEPENDENT LEARNING

GCSE CHEMISTRY

1. After each lesson, review the lesson content and make a note of anything that you don't fully understand. Locate the relevant information on the Kerboodle website, your revision guide and in the AQA textbook. Add anything extra or interesting to your notes.
2. Regularly use Chemistry revision sites. There are links to some of these on the GCSE Chemistry Teams page:
 - www.chemguide.co.uk
 - www.chemsheets.co.uk
 - www.revision-notes.co.uk
 - www.kerboodle.co.uk
3. Use the journals in the school library to keep up to date with the latest Chemistry issues.
4. When you know that you will be completing a Required Practical Task, consult the AQA learner skills checklists and the videos of these; on Teams. Ensure that you are fully prepared by making any extra notes that you need in your exercise book.
5. Regularly check the AQA website and the Chemistry Teams pages for updated assessment material.
